CATALOG INFORMATION

- Decals are shown actual size, except where noted.
- All decals are sets (left and right) unless noted.
- Logos and names sold by the sheet. (If it says 3/\$1, order one of the catalog number and you will receive three items.)
- Illustrations are to help identify what you want. Multi-color decals will appear to have wrong or missing colors in black and white. See our website for a color photo.
- If a decal is listed as "yellow" or "yellow print", it is printed in yellow on a clear background. It will appear black in the catalog. If it is listed as "black on yellow", then it is printed on a yellow background.

INSTALLATION INSTRUCTIONS

- **NO WATER!!** Decals are adhesive.
- Many decals have the catalog number printed on the sheet. The catalog number is for the most common application, but the decal may also be a part of other sets. This is particularly true of logos.
- Sheets may contain extra decals used for similar models.
- A few decals are die-cut, but most will require cutting. Trim close to the decal if on clear film. On colored stock, trim by cutting along a black, white or other natural line. In some cases you will want to cut off the "cut" line.
- Peel off the backing and apply. Use an X-Acto knife or similar tool to help position the decal.
- On large decals, remove part of the backing, position the decal and press into place. Then remove the rest of the backing and apply the remainder of the decal.
